

Health Care Contracting and Reimbursement; Information On-Demand

The Revolution Has Begun

Healthcents Physician Contracting has been in the trenches negotiating and evaluating health care contracts for clients since 1994. Now, we have brought our experience and expertise to bear by arming you with the tools to easily and conveniently access the same kinds of

data that payers are looking at in negotiations.

Key Features and Benefits of Healthcents Revolution Software:

- Compares your rates by CPT code to what other similar providers are receiving from payors in your locality, state and across the USA. Also gives you your rates as a percentage of Medicare for your locality.
- Looks for key operational language such as term and termination, claims processing requirements,

insurance requirements, multiple procedures, and implants.

- Provider can submit contracts for analysis in many formats including PDF, Word, Text, and by fax.
- Internet-based web service with security by client.
- Only known tool that automates the analysis of provider insurance contracts.
- Geographic Look-Up: Find out how many competing practices are within a small radius. Allows you to know who they are and how close they are to you.
- Repository: A place to store all of your contracts and documents related to those contracts, on-line, in one easy to find secure location.
- Initial version supports Physician and ASC agreements.
